Allowable Subject Matter

1. Claims 1-39 are allowed.
2. The following is an examiner's statement of reasons for allowance:
3. The prior arts of record do not anticipate or render obvious to one skilled in the art an active matrix substrate or a method of manufacturing an active matrix substrate comprising various elements or steps of forming various elements as claimed, more specifically a metal layer in the openings of the insulating film and in contact with the electrode wiring to cap the openings wherein one or more of the openings and the metal layer are provided along substantially the whole length of at least either one of the scanning electrode wiring and the signal electrode wiring.
4. The closest reference USPAT 5,166,085 discloses and shows in Fig. 9, an active matrix substrate wherein a metal layer (109) is formed in the opening of the insulating film (108) and in contact with the electrode wiring (107) to cap the openings. However, the reference alone or in combination with any other prior art references fail to teach or suggest the claimed limitation such as one or more of the openings and the metal layer are provided along substantially the whole length of at least either one of the scanning electrode wiring and the signal electrode wiring.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
